Education

- **Indian Institute of Information Technology, Guwahati** — Assam, India
  Bachelor of Technology - Computer Science, GPA: 8.21 — *August 2019 - May 2023*
  Courses: *Operating Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence, Networking, Databases*

Skills Summary

- **Languages**: TypeScript, JavaScript, Python, C++, Java, PHP, SQL, Bash
- **Frameworks**: React, Next.js, React Native, Node.js, Redux, Angular, Material-UI, Tailwind CSS
- **Tools**: Git, Docker, Kubernetes, PostgreSQL, MySQL, Redis, Postman, CI/CD
- **Platforms**: Linux, Web, Windows, AWS
- **Soft Skills**: Leadership, Event Management, Writing, Public Speaking, Time Management

Experience

- **FamPay** — Bangalore
  Software Development Engineer II (Full-time) — *Oct 2025 - Present*
  - **Payments and Card Experience**: Owned frontend for the UPI and FamX card flows serving 10Mn+ teen and young-adult users. Rebuilt the checkout and transaction-detail screens, lifting payment completion rate by 12% and cutting payment-related support tickets by 30%.
  - **Design System and Platform**: Led the migration to a shared, token-driven component library across web and React Native surfaces. Cut new-screen build time by 40% and removed 25K+ lines of duplicated UI code across 4 product squads.
  - **Performance and Reliability**: Drove app performance initiatives: lazy loading, bundle splitting, and render optimizations that reduced cold-start time by 35% and crash-free sessions to 99.9%. Set up frontend observability with alerting on p95 latency and JS error rates.
  - **Growth and Experimentation**: Built the in-house A/B experimentation layer for onboarding and referral flows, enabling 20+ experiments per quarter and a 15% uplift in KYC completion for new users.
- **Juspay** — Bangalore
  Software Developer (Full-time) — *Sept 2023 - Oct 2025*
  - **Lightbox Analytics Dashboard**: Built and enhanced *Lightbox*, a real-time frontend analytics dashboard visualizing 100Mn+ transactions daily. Improved dashboard usability to help merchants detect and resolve payment issues 40% faster, reducing support team workload by 35%.
  - **AI-powered No-Code Assistant**: Developed an AI-powered, chat-based assistant that enables merchants to create and manage payment configurations using natural language. Reduced onboarding and configuration time by 50%, giving merchants greater control with minimal technical intervention.
  - **Legacy Config Upgrade Automation**: Automated the upgrade of outdated payment page configurations by writing scripts to migrate legacy versions. Reduced manual upgrade effort by 80%, saving the support team 20+ hours per week and ensuring 100% of merchants benefit from the latest features.
  - **Studio Performance Optimization**: Improved Studio's frontend performance and scalability by implementing code splitting, virtualized lists, and state optimizations. Reduced bundle size by 35%, improved page load times by 50%, and maintained 99.98% uptime for 200+ merchants.
- **Tekion** — Bangalore
  Software Developer (Intern) — *Jan 2023 - Jul 2023*
  - **Customer Relationship Management**: Shipped lead-tracking and follow-up features on the dealer CRM platform used by 500+ automotive dealerships, working across React and Java Spring services.
  - **Email Communication System**: Built the templated email communication module (composer, scheduling, delivery tracking), cutting manual dealer outreach effort by an estimated 30%.

Projects

- **NFT-Builder — ReactJS, Material-UI, Web3**: NFT generation and marketplace platform for artists and collectors. Users can create, mint, and sell NFTs; creator and collector profiles show collections and transaction history, with a secure payment-gateway integration.
- **Receiptify — MERN Stack**: Invoicing tool for freelancers and small businesses. Generates and emails invoices, receipts, and bills with due-date tracking, backed by a clean admin dashboard for managing clients and payments.

Publications

Authored articles on data structures, algorithms, operating systems, and computer networks for GeeksforGeeks.

Achievements and Volunteer Experience

- Solved 1000+ problems on LeetCode and Codeforces; ranked 3rd in institute on the GeeksforGeeks platform.
- Sponsorship and PR team member for institute fest Yuvaan 2020; captain of the Batch of 2019 football team.
